

ALBA TREES NURSERY

Alba Trees plc is delighted to have been invited to become Associate Members of SOPA.

We are a nursery located in East Lothian, near Haddington, producing cell-grown stock. Our product range includes trees, shrubs, hedging, wild-flowers and reeds. We specialise in native species of known local provenance and sell some seven million plants per year.

This year we have celebrated our 21st birthday and passed the milestone of 100 million plants delivered.

We also sell tree shelters, stakes and planting equipment.

Cell-grown planting stock is different from bare-rooted plants in that the roots are protected in the compost plug in which they were raised on the nursery. This confers several important benefits:

- They can be planted almost all-year round
- They will achieve maximum establishment, hence minimum “beating-up”
- They will not “check” on planting, hence rapid early growth
- They are very easy to plant well, each plant having an identical root plug

Cell grown plants will stay fresh until planted, even if delayed for several weeks or even months

Our trees and hedging plants are graded in height, generally as 20-40 and 40-60 cms.

We also grow a range of trees in larger containers, up to 1.5 metres in height.

We deliver throughout the UK, either on our own transport or overnight carrier.

Please visit our website to “meet” the team and for a virtual nursery tour.

Or call the sales office to discuss your requirements and get a quotation.
